## ENGINEERED MOWING SOLUTIONS

Back in the 1950s, our founder and namesake Alfred Schefenacker (AS) was an inventor living in Southern Germany. During his daily walks outside Stuttgart he noticed how difficult it was to mow between the steep and narrow rows of the local vineyards. Besides being steep, vineyards were only mowed perhaps once per year and the prunings left thick vines along the way. There seemed to be no solution to this tough mowing job, so Schefenacker decided to invent one.

Knowing the engine is the heart of every machine, Alfred built his own custom two-stroke engine to power the first Allmäher® (all-mower) up slopes. Light, powerful, and specifically engineered for rough-terrain, the AS-Motor Allmäher® was a major innovation, significantly improving an otherwise onerous task.

AS-Motor would remain a major innovating force in the years to come, and today remains one of the most trusted manufacturers of professional-grade mowers in Europe and around the world for municipalities, landscapers, grounds-keeping and private users. Its history of engineering milestones translates to a culture of innovation that keeps AS-Motor on the cutting edge of the industry, culminating with this year's US launch of the AS Sherpa RC – the world's first ride-on rough-terrain mower with remote control. AS-Motor still engineers all its machines in-house, from a 12-person strong Research & Design team all the way to testing, components manufacture and final assembly.

Driving around Southern Germany today, one can still see farmers using the Allmäher® they bought 30 years ago. Some miles down the road at AS-Motor's headquarters in Bühlertann, the Allmäher's original design is still being manufactured by a socially and environmentally responsible company, confirming Alfred Schefenacker's founding philosophy from way back in 1959 – robust machines built to last, and a vision for the future.

# AS RIDE-ON MOWER

## PART ATV. PART MOUNTAIN GOAT. ALL ALLMÄHER®.

When the zero-turn ride-on mower burst onto the scene people immediately recognized it as a better way to mow their lawns. If one is maintaining a large area with average contours, there's no better tool. But putting a zero-turn mower on slopes or rugged terrain is to invite problems, or worse. They're simply not designed for that job – it's too dangerous.

The AS 940 Sherpa 4WD was engineered specifically for use in rough conditions where other mowers are simply not practical. With 22 horse-power, permanent all-wheel drive, a locking differential, a low center of gravity and large agricultural tires for ground clearance and difficult terrain, the Sherpa is incredibly sure-footed. Slopes, ditches, rough terrain – no problem.

Grass and brush up to 5 feet high don't stand a chance when faced with the Sherpa's 36" mowing deck that houses a swing-blade version of our legendary cross-blade cutting system. The Sherpa has what it takes to power through.

### LET THE AS 940 SHERPA BE YOUR GUIDE

The AS 940 Sherpa 4WD is the high-grass ride-on mower for professional use in rough-terrain and slopes, preferred by professional landscapers and large property owners alike. The tubular frame ensures a robust yet agile design, leaving a light footprint on soft soil. Variable speed, compression braking and hydrostatic drive make the Sherpa stable up and down hills. A foot-activated differential lock guarantees that the Sherpa's wheels pull in unison whenever the going gets tough.

The Sherpa is designed for operator comfort as well as performance. Slide into the driver's seat and the first thing you'll notice is the low and comfortable riding position. The Sherpa's adjustable suspension seat provides reliable comfort and plenty of legroom for long working periods. The rear-engine design makes steering light and responsive. All controls are intuitively placed and within easy reach. A folding brush bar overhead works to keep branches and shrubbery out of your way.

The powerful and easy-to-maneuver AS Sherpa 940 4WD is the choice for anyone mowing difficult terrain.

# AS RIDE-ON MOWER

## AS 940 SHERPA 4WD XL

Terrain too rough for a normal ride-on mower? No problem. Grass and brush up to 5 feet high are no match for the AS 940 Sherpa's 22 horse-power, permanent all-wheel drive, differential lock and legendary AS cross-blade cutting system.

A robust yet agile design and low center of gravity make the Sherpa rock-solid on slopes and rough terrain. Large agricultural tires and high ground clearance provide even more traction and stability.

Our engineers have packed the best of nearly 60 years' experience into this machine, which is why the Sherpa is the preferred high-grass ride-on mower for professional use on slopes and rough-terrain.

## AS 940 SHERPA 4WD XL

Seat adjustable to match driver's weight

Rough-terrain compatible 4-gallon fuel tank for long distances

Galvanized bull bar

Switchable differential lock for optimized traction

### CROSSBLADE TECHNOLOGY

The AS cross-blade system cuts and shreds at the same time, reducing high grass and thick undergrowth to a fine mulch.

### COMFORTABLE COCKPIT

An adjustable suspension seat ensures "all-day" comfort and maximum legroom.

### ALL-WHEEL DRIVE

Permanent all-wheel drive provides better traction and control when going up or down slopes.

### SURFING MOWER DECK

The mowing deck is designed to float, protecting the mower and providing additional ground clearance on uneven terrain.

## TECHNICAL INFORMATION

# AS RIDE-ON MOWER

## IN FOCUS: THE NEW AS 940 SHERPA 4WD RC

The world's first ride-on mower with remote control offers even more safety and work convenience, especially on rough and difficult-to-access terrain.

There are many areas where mowing can be unpleasant or even unsafe, including on slopes, loose soil, under trees and bushes, along hedges, in the vicinity of stinging nettle or insects and in rain or bad weather.

These areas can be worked safely and conveniently with the AS Sherpa RC, via a professional remote-control unit with a range of several hundred yards. Mowing is now possible regardless of terrain, at a safe distance and without direct exposure to noise or exhaust fumes. By expanding the application area, the new remote-controlled AS 940 Sherpa 4WD RC is AS-Motor's most versatile mower yet!

## THE BEST OF THE SHERPA, PLUS REMOTE-CONTROL

The AS 940 Sherpa 4WD RC combines the advantages of the Sherpa 4WD XL with the advantages of remote control, ensuring your toughest mowing jobs can be tackled no matter the conditions.

The Sherpa RC can be used in remote-control or ride-on mode, with an easy, mechanical changeover between the two. In remote-control mode, the Sherpa RC expands the mowable terrain by providing more safety in rough and difficult-to-access areas, and on slopes up to 33-degrees. The Sherpa's ride-on mode provides faster working speed on flat or normal terrain, quick maneuvering around obstacles and intuitive, car-like driving. Save time and increase operator safety with the Sherpa RC!

## AS 940 SHERPA 4WD RC: THE FIRST **NEW** RIDE-ON MOWER WITH REMOTE CONTROL

Mow difficult terrain safely. AS-Motor's commitment to technology and innovation is evidenced by the Sherpa RC (Remote Control) – the world's first rough-terrain ride-on mower with remote control. Whether in manual or remote-controlled operation, with the new AS 940 Sherpa 4WD RC you can mow slopes, high grass and rough-terrain safely and conveniently.

### REMOTE CONTROL OPERATION AND MANUAL OPERATION ARE POSSIBLE

Professional remote control unit with 300-yard range, main functions:

- Adjustment of the cutting height
- Engine On / Off function
- Blade On / Off
- Steering via remote control unit
- Differential lock
- Maximum slope incline
  - remote controlled operation 33°
- Safety functions
  - Engine protection function at low oil pressure
  - Emergency stop on the machine
  - Warning signal at 33° incline

Rough-terrain compatible 4-gallon tank for long distances

Galvanized steel bull bar

Switchable differential lock for optimized traction

### MORE SAFETY

Safer work on slopes and rough and difficult-to-access areas.

### MORE CONVENIENCE

Convenient operation from a safe distance, without exposure to dust, noise or exhaust fumes.

### EXPANSION OF MOWABLE AREA

Mowing even in bad weather, on loose or wet soil and on terrain that is extremely uneven.

### MORE EFFICIENCY

Work under trees and bushes, along hedges, in stinging nettle and in the vicinity of wasp nests.

### PROFESSIONAL REMOTE CONTROL SYSTEM

Remote control with a range up to 300 yards and easy, mechanical changeover to ride-on mode.

## TECHNICAL INFORMATION

Item no.	Model description	Cutting width	Engine	Rated power	Maximum engine power	Wheel drive speed	Cutting height adjustment	Weight/operating dimensions	Price
G06900403	AS 940 Sherpa 4WD RC	36"	B+S 4-stroke 2-Cylinder Engine Professional Series 8 724 cc	22.4 hp / 3,300 rpm	27 hp / 3,600 rpm	Permanent four-wheel drive Hydrostatvariable, Forward: 0 - 4.2 mph Reverse: 0 - 4.0 mph	Central 3.1 - 5.3 inches 5 height settings	732 lb L 75 / W 42 / H 61 inches	\$22,998

# AS FLAIL MOWER

## A WEAPON OF GRASS DESTRUCTION

The AS 901 is a completely different kind of mower. Instead of a traditional single rotating blade, the 901 uses 26 free-swinging knives known as flails that extend from one side of the cutting chamber to the other. As the drum rotates at high speed, these flails quickly reduce waist-high grass, briars and dense undergrowth to small particles. High grass and thick shrub are no match for the AS 901 Flail Mower's robust cutting technology.

The AS 901 delivers safety alongside power. Flails are designed not only to quickly digest mass quantities of overgrown vegetation, but also to dodge foreign objects. In areas where grass and weeds may be mowed only once or twice per year, the free-swinging flails simply ride up and over any unseen obstacle, protecting the mower and the operator. This "cut and drop" action makes flail mowers much safer for use in parks, roadsides and anywhere the job requires mowing closer to people, pets and property.

### IN FOCUS: AS 901 SM FLAIL MOWER

With a 36" cutting width and a 16 horsepower Vanguard engine, the AS 901 SM is the perfect size – big enough to quickly work large areas, yet small enough for use in rugged ditches or on steep hillsides. Features such as independent steering brakes, handlebars easily adjustable for height, and stone guard flaps guarantee operator safety and comfort.

Equipped with a five-speed transmission, locking differential, and agricultural tread twin tires, the AS 901 provides easy maneuverability and excellent traction, regardless of terrain.

# AS FLAIL MOWER

## AS 901 SM

The AS 901 Flail Mower has a rugged 36" flail deck backed up by a 16 horsepower Vanguard engine. Five speed transmission with locking differential, independent steering brakes and dual wheels are standard equipment. A wide range of other features, all designed to deliver comfort and control, qualifies the AS 901 SM as the best tool to tackle your toughest mowing challenge.

### RUGGED FLAIL MOWING MECHANISM

Durable steel cutter housing with 26 high-speed Y flails. Two-stage safety barriers provide protection for operator and bystanders.

### CONTROL IS AT YOUR FINGERTIPS

No need to “man handle”— independent steering brakes provide precise effortless control.

### NO-HASSLE HEIGHT ADJUSTMENT

One touch lever provides quick and easy cutting height adjustment.

### TRACTION SYSTEM

Moves with poise and confidence. A five speed transmission with differential lock, steering brakes and dual wheels provides you with all of the tools necessary to work in difficult terrain.

## COMING TO AMERICA SOON ... !

### AS 920 SHERPA 2WD

**A versatile, powerful ride-on rough-terrain mower**

The 940's little brother. With a short turning radius and limited slip differential, the Sherpa 920 is agile and powerful, effortlessly mulching high grass and brush with speed and ease.

### AS 63 4T

**A fine example of AS-Motor's decades of engineering prowess**

Years of design and engineering have culminated in the AS 63, an impressively maneuverable, agile machine with outstanding cutting and mulching performance.

### AS 65 4T

**Engineered for high grass and brush from the ground up**

A 26" cutting width, 5-speed transmission, limited slip differential and robust cross-blade cutting system ensure that the AS 65 is a powerful machine that gets the job done.

### AS 510 PROCLIP

**Purpose-built for polished lawns**

One of the finest mulching mowers on the market, the professional AS 510 lawnmower was specifically engineered to chop grass into the tiniest pieces, delivering a remarkable finish.

## EXPANDING OUR HIGH GRASS EMPIRE

AS-Motor has grown considerably over the past 60 years, from the original Allmäher® to an extensive product range and a distribution network that spans over 30 countries and 4 continents.

But we have not forgotten our humble beginnings. AS-Motor prides itself on still being family-owned and operated – this translates to innovative solutions through engineering and manufacturing excellence, and exceptional customer service. After bringing two of our best-selling mowers to North America, AS-Motor is extremely excited to launch our most innovative machine yet – the AS 940 Sherpa RC. We expect this line-up to fill the current void in the North American market for high-grass, rough-terrain and slope mowers.

As manufacturers of professional equipment, we understand the importance of "up-time." AS-Motor's dealer network and experienced sales reps on the ground work together as a team to guarantee the best in parts and after-sales service, keeping you up and running.

## LIMITED WARRANTY – AS-AMERICA ROUGH TERRAIN MOWERS

Because of our confidence in our machines' performance and longevity, AS-Motor is prepared to offer warranty terms that match the best in the industry.

### GENERAL:

- › 2 Year Limited Warranty

### 90 DAY EXCEPTIONS:

- › Products used for rental purposes are covered by a 90-day warranty
- › Wear items such as drive belts, blades, hydraulic hoses and tires
- › Batteries are covered by a 90-day warranty

### EXCEPTIONS:

- › Engines and electric starters are covered by the engine manufacturer's warranty period
- › Any damage or deterioration due to normal use, wear and tear, or exposure. Cost of regular maintenance service or parts, such as filters, fuel, lubricants, tune-up parts, and adjustments
- › As is customary, this warranty does not cover any mower that has been subject to misuse, neglect, negligence or accident, or that has been operated in any way contrary to the operating instructions specified in the Operator's Manual

Please visit [www.as-america.com](http://www.as-america.com) for the full legal warranty statement.

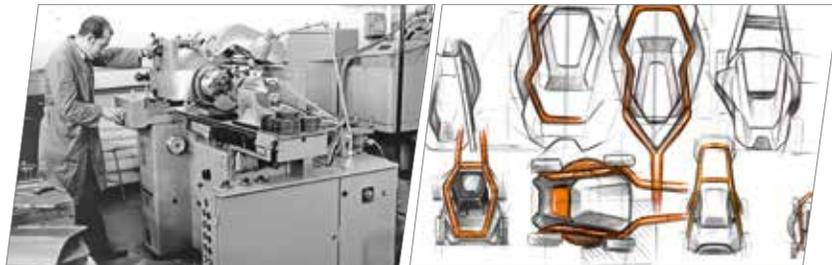

This warranty is limited to the original purchaser and is not transferable. Proof of purchase will be required by the dealer to substantiate any warranty claims. All warranty work must be performed by an Authorized AS-America Service Dealer using AS-America approved replacement parts.

## REAL VALUES ARE TIMELESS

They are what motivate us every day – for nearly 60 years

### EXPERTS IN HIGH GRASS AND SLOPE MOWING

AS-Motor is the market leader of robust yet agile professional-grade mowing machines, engineered specifically for slopes, high grass and rough-terrain. Whether mulching or flail mowers, ride-on or remote-controlled 4-wheel drive units, our machines can handle challenging terrain with ease and efficiency.

### OUR STRENGTH - ENGINEERING

AS-Motor develops all its mowers in house – from initial concept to a vertically-integrated manufacturing process. With 12 employees in our proprietary Research & Development department, AS-Motor stays on the cutting edge, responding to the needs of our customers with new, innovative products.

### QUALITY OVER TIME

AS-Motor is dedicated to the Made in Germany label— quality, craftsmanship and tradition. The average AS-Motor employee has worked at the company for over 25-years, instilling a culture of continuity and expertise. Quality means not only that our machines are built to last over time, but rather to endure across generations.

## OUR PHILOSOPHY: SUSTAINABILITY

Our machines are known for their long service life and reliability. All spare parts are guaranteed to be in-stock and available for at least 15 years after a model is discontinued. This means less waste, and a sustainable vision for the future.

## TRADITION

Founded by South-German inventor Alfred Schefenacker in 1959, AS-Motor's first Allmäher was engineered to mow the steep slopes of vineyards. Now in its third generation of leadership, AS-Motor is a family company that remains committed to longevity, innovation, and an ethos of environmental and social responsibility.

## PARTNERS TO SPECIALIZED RETAIL

We are committed to strong, loyal partnerships with our qualified dealer network. The best way to see an AS-Motor machine at work is through a product demonstration with your local dealer or one of our sales reps.
